

# Doubling Up Housing

## Key Findings

- “Doubling up” refers to a situation where individuals are unable to maintain their housing situation and are forced to stay with a series of friends and/or family members.
- Countywide, 15% of residents provided temporary housing to another person.
- Residents were asked for the reason that they provided housing to another person. About 5% did so because of a health problem, 9% because of loss of housing, and 11% because of financial hardship. See chart to right.

Reasons Provided Housing to Another Person in Past 12 Months

Worried About Paying Rent or Mortgage in Past Year

- One third of residents were worried or stressed about paying rent or mortgage in the past year (36%).
- Half of residents living at or below the Federal Poverty Level\* were worried or stressed about paying rent or mortgage (51%), compared to one third of residents with higher incomes (33%).
- Residents of Greeley/Evans most frequently reported concern about paying rent or mortgage (42%), and residents of the North region least frequently reported concern (21%).

\*100% Federal Poverty Level (100% FPL) in 2015 was \$11,770 for single person, \$4,160 for each additional person, and \$24,250 for a family of four.

# Weld County 2016 Community Health Survey

## About the Survey

### Description of Responders

#### Age Groups

#### Race/Ethnicity

#### Household Income

### The Survey Explained

- In order to periodically assess the health status of county residents, between September 6, 2016 and November 17, 2016, Weld County Department of Public Health & Environment contacted 8,494 households by mail requesting an adult to complete the 55-item survey or complete it online.
- Question topics included health, health care access and insurance, health conditions and lifestyle habits, preventive screenings, environmental issues, community concerns and needs, and demographics.
- Households were selected randomly by first dividing the mailing list into **four regions (see map below)** and two household types (single-family vs. multi-family). The list was certified by the post office but did not contain residents' names.
- After multiple contacts, 2,080 community residents returned usable surveys for a 25 percent response rate. The results are representative of the population within a ±5.0 percent margin of error.
- To see the actual survey go to: [www.weldhealth.org](http://www.weldhealth.org)
